

Isidro G Pentzke

My name is Isidro G Pentzke everyone calls me Sid and I am a visual artist. I use Photography as my medium. I have been in the visual arts for over 17 years. I started my formal education in the arts in high school. I continued my education into college I received my Bachelor of Fine Arts in Studio Arts from Florida Atlantic University 2013. I am now attending Lesley university for my Master of fine art in studio arts, I am on track to graduate in June 2018.

I love taking all types of photography from landscapes to creative photography. Currently I am photographing abandoned objects that have been discarded or just forgotten. I find that I identify with these objects on a personal level, these objects hold no specific intrinsic value to me other than telling their story. This new work is most commonly described as elegant, simplistic, with a hint of wonder.
